

# AI Usage DISCLOSURE FORM

## 1. Team Details

Team Name: ClawMentors

Project / Product Name: ClawMentor Bharat

Organization / Institution (if any): RV College of Engineering, Bengaluru

Submission Date: May 8, 2026

## 2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No- Yes

## 3. Purpose of AI Usage ( Brief Details)

Idea generation / brainstorming - Used ChatGPT / Gemini to brainstorm the agent's architecture, memory structures, and career intelligence features.

Code generation or assistance - Used AI assistants (GitHub Copilot / Gemini) for writing boilerplate Python code, OpenClaw skill implementation, and API integrations.

UI / UX design – N/A

Content creation - Drafted the agent persona (SOUL.md, IDENTITY.md) using LLMs.

Data analysis - The agent utilizes the **Groq API (Llama 3)** to analyze resume text and match it against industry job requirements.

Testing / debugging - Used AI coding assistants to debug OpenClaw Gateway configuration errors.

Other - The core reasoning and daily plan generation of the agent relies on the **Groq API**.

## 4. Feature Origin Classification ( Please add/delete based on the number of the feature)

1. Feature Name - Resume Gap Analyzer

2. Self-Generated/AI-Generated/Both - Both

3. Description ( include AI tools/platform Used, prompt used , Output Summary, Modification) –

- **AI Tools/Platform Used:** GitHub Copilot (for coding), **Groq API / Llama 3** (for inference).
- **Prompt Used:** *"Analyze the following parsed resume text against standard software engineering industry requirements and identify missing technical skills."*
- **Output Summary:** A list of missing technical skills and recommended additions.
- **Modification:** We self-generated the PyMuPDF parsing logic and the OpenClaw skill wrapper, modifying the LLM output to dynamically update the student's ROADMAP.md memory file.

1. Feature Name - Daily Learning Planner

2. Self-Generated/AI-Generated/Both - Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) –

- **AI Tools/Platform Used:** **Groq API / Llama 3**
- **Prompt Used:** *"Generate a personalized daily learning plan for today. Keep it concise covering morning, afternoon, and evening. Focus on coding, project building, and interview prep."*
- **Output Summary:** A realistic daily schedule breaking down topics into actionable chunks.
- **Modification:** We wrote the Python scheduling logic to trigger this generation and modified the LLM output to be cleanly formatted for the Telegram/WhatsApp bot adapter.

1. Feature Name - Core Agent Persona & Memory Profiles

2. Self-Generated/AI-Generated/Both - Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) –

- **AI Tools/Platform Used:** **ChatGPT / Gemini**
- **Prompt Used:** *"Draft a system prompt and persona for a proactive, motivating AI career mentor designed specifically for Indian engineering students."*
- **Output Summary:** Detailed markdown files establishing the agent's behavioral logic and tone.
- **Modification:** We heavily edited the generated persona to integrate correctly with the OpenClaw 5-Layer Stack and added specific Indian engineering context.

## **5. Ethical & Compliance Confirmation**

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

## **6. Declaration & Sign-Off**

Name of Team Representative: Sahana V S

Role: Team Lead & Core Development

Signature: Sahana V S

Date: May 8, 2026
